

IT: Verificare che le dimensioni della porta e dell'imbotte corrispondano. Controllare lo spessore del muro.
 GB: Verify the correspondence between the measure of the door and the frame extension. Control the wall thickness.
 FR: Vérifier la correspondance entre les dimensions de la porte et de l'habillage. Contrôler l'épaisseur du mur.

IT: Sballare e assemblare l'imbotte utilizzando le viti autofilettanti in dotazione ($\varnothing 4,8 \times 19 \text{mm}$).
 GB: Unpack and assemble the frame extension by using the supplied self tapping screws ($\varnothing 4,8 \times 19 \text{mm}$).
 FR: Déballez et assemblez l'habillage en utilisant les vis autotaraudeuses fournies ($\varnothing 4,8 \times 19 \text{mm}$).

IT: Forare solo il telaio della porta Rever (non l'imbotte), con punta $\varnothing 5 \text{mm}$, in corrispondenza dei fori di fissaggio presenti sull'imbotte.
 GB: Drill just the frame of the Rever door (not the frame extension), with $\varnothing 5 \text{mm}$ drill bit, so that it matches with the pre-drilled holes for the fastening of the frame extension.
 FR: Percer le dormant de la porte Rever seulement (pas l'habillage), avec un foret $\varnothing 5 \text{mm}$, en concordance avec les trous de fixation prédisposés sur l'habillage.

IT: Premere bene l'imbotte contro il telaio e fissare l'insieme utilizzando viti autofilettanti a testa cilindrica $\varnothing 3,5 \times 19 \text{mm}$ (non fornite).
 GB: Push the frame extension against the doorframe and fasten the assembly with $\varnothing 3,5 \times 19 \text{mm}$ pan head self-tapping screws (not supplied).
 FR: Bien presser l'habillage sur le dormant et fixer l'ensemble avec vis acier tête cylindrique $\varnothing 3,5 \times 19 \text{mm}$ (non fournies).
