

175-GB 5001512/2 06/13 1/2

 $For door\,with\,environmental\,characteristics\,see\,also\,the\,enclosed\,complementary\,installation\,instructions.$

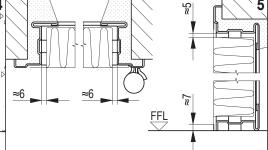

Unpack the door being careful do not throw away the FC thermo expanding gasket (included in package) that will be used for the operation in pos. 7. Verify the correspondence between the wall opening and the dimension printed on the sticker applied on the frame. Establish the Finished Floor Level (FFL) and the opening direction. Make sure that the walls are made of blocks, bricks or homogeneous cement with a density of 1200±400 kg/m³ and a thickness of min. 150mm.

If the frame rests on the FFL carefully detach internal distance profile.

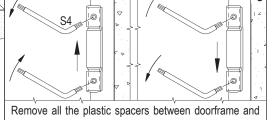

Bend up the frame-brackets and mark on the wall their positions respecting the FFL. Create the holes in the wall for the brackets.

Insert a 10 mm spacer (X) under the door leaf with FM $L \ge 1000$ mm. Temporarily immobilize the door in the wall space, using a spirit level, true to the wall, the FFL and the parallel walls and fix the wall anchors with quick drying cement.

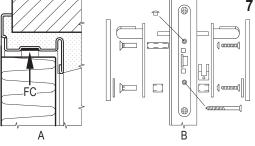

Fill up the space between the doorframe and the wall with mortar without bend the doorframe, covering it with plaster and check the leeway.

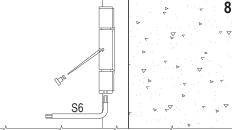

Remove all the plastic spacers between doorframe and leaf. Adjusting of the bearing hinge:

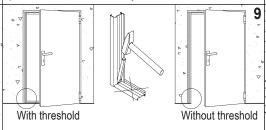

to raise the door leaf unscrew the upper socket set screw, screw on the lower one, screw on the upper one again; to lower the door leaf unscrew the lower socket set screw, screw on the upper one. Operation to be carried out with the max, care with the aid of a lever.

- A) Glue the thermo expanding gasket (FC) onto upper transom of doorframe.
- B) Install the door handle.

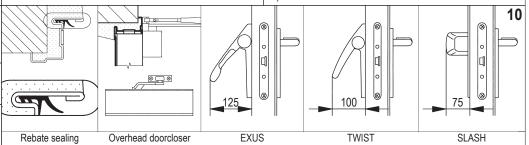

Wind up the spring hinge in the opening direction and insert the tension pin. Even if self closing is not needed or overhead doorclosers are installed, blocking the hinge spring anyway with the tension pin.

Warning: the threshold does not be removed in case of door with environmental characteristics.

In case the threshold is not needed, cut it with a chisel. Univer door is government approval with or without the bottom frame.

Accessories: rebate sealing - overhead door closer (the spring hinge must be anyhow slightly loaded) - EXUS, TWIST or SLASH panic bar.

HANDLING AND STORAGE - COMPLAINTS

Handling: in case of handling with webbing slings/ropes, place them under the feet of the pallet; avoid to place them under the boards; avoid that the action of slings/ropes produces too much pressure upon the doors, by means of spacers interposed in the upper part. Do not handle the leaves using suction caps. Storage: it is duty of the company/person taking over the doors to store them in a suitable place so that they will be protected from the natural agents and from the direct sun rays. If during transportation or truck unloading it rains or snows on the doors it is necessary to remove immediately the nylon film from each leaf and doorframe put them in vertical position to dry appropriately. Complaints: in case of external visible defects on doors, they have to be marked in the copy of the transportation document to be returned to the forwarder and notified to the manufacturer by registered mail within 48 hours. We remember that according to our general conditions intrinsic defects have to be notified to the manufacturer within 8 days from the delivery date by registered mail. Goods with defects never have be utilized or assembled, they should be stored at disposal for controls by the manufacturer appointed person.

Move the materials with appropriate means.

Store and handle the materials with care.

Assemble by qualified staff only.

Do not expose the materials to the naturals agents.
