

## INSTALLATION, USE AND MAINTENANCE HANDBOOK FOR EI<sub>2</sub>60, EI<sub>2</sub>90, EI<sub>2</sub>120 AND MULTIPURPOSE PROGET DOORS BLOCK FRAME FOR IN THE REVEAL APPLICATION

166-GB	2/4
100-00	2/4

GENERAL NOTES	USE AND MAINTENANCE INSTRUCTIONS FOR PROGET DOORS
STANDARD: the assemble instructions have to be followed in every detail to respect the test conditions and assure the perfect functioning of the door, including the self-closing for fire-rated doors. Furthermore a regular service is necessary. Multipurpose doors are not endowed with thermoexpanding gaskets, doorframe insulation and closing regulators.	All fire-rated doors located in escape routes need regular maintenance in order to verify that no damage occurred and that they close regularly. The scheduled maintenance shall guarantee that the leaf swings correctly and that the self closing mechanism works properly. The doors shall be kept free from any obstructions.
LIABILITY: it is duty of the installer to follow the installation instructions in any detail, specifically point 6, 7 and 8 in order to guarantee the safety of the end-users.	Any 5.000 opening cycles but at least every 6 months the following operations shall be carried out: - lubricating the ball-bearing hinge;
MASONRY WORKS: for fire-rated doors the wall thickness must be at least 200mm. It's the customer's responsibility to keep the wall integral particularly in the anchor points of the door, the application of silicon on both sides of the doorframe perimeter. This is particularly valid for fire-rated doors.	<ul> <li>- lubricating the spring hinge and the spring after removing the tension pin;</li> <li>- wind up the spring inserting the tension pin. Verify that the closing force is sufficient to shut the door if opened to 30±2°;</li> <li>- lubricating the lock and the latch.</li> </ul>
FINISHING: the serial door is finished with an epoxy-polyester powder paint oven-baked at 180 °C. The surface is orange-skin and particularly resistant. In case an additional paint is desired we advise to follow these instructions: - make smooth the surfaces with sandpaper and dust them; - give a first hand of opaque 2 components epoxide using the product ALCEA EPOX 5203 / 0059 (beige); - finish the surfaces with enamels or paints to your choice.	For double leaf doorsets additional controls shall be carried out: - verify the functionality of the secondary leaf's rods and lubricate its guide rail; - clean the hole of the floor catch set; - lubricate the lock and the self-locking device (top onto passive leaf); - verify the regular functionality of the closing regulator (in case of RC/STD, the arm must be in perpendicular position to the main leaf); lubricate the mobile parts of the closing regulator.
CLEANING: the doors are supplied from the factory clean and packed. We suggest to use a clothe and soaped water only. Do not scratch the surfaces.	Verify the regular functionality of the doors accessories (handle, panic bar, overhead doorcloser etc.). Their mobile parts shall be lubricated too, following the dedicated instructions.
WARRANTY: the manufacturer gives warranty as per Italian law (C.C.1495). Any claim for missing or damaged goods have to be recorded by inserting a written remark in the delivery notes and must be notified the maximum within eight days from the date of	In case of irregular functioning of the door or its accessories contact an authorized installer or replace the damaged accessories.
materials receipt.	Note: for lubrication use viscous products.

#### HANDLING AND STORAGE - COMPLAINTS

Handling: in case of handling with webbing slings/ropes, place them under the feet of the pallet; avoid to place them under the boards; avoid that the action of slings/ropes produces too much pressure upon the doors, by means of spacers interposed in the upper part. Do not handle the leaves using suction caps. Storage: it is duty of the company/person taking over the doors to store them in a suitable place so that they will be protected from the natural agents and from the direct sun rays. If during transportation or truck unloading it rains or snows on the doors it is necessary to remove immediately the nylon film from each leaf and doorframe put them in vertical position to dry appropriately. Complaints: in case of external visible defects on doors, they have to be marked in the copy of the transportation document to be returned to the forwarder and notified to the manufacturer by registered mail within 48 hours. We remember that according to our general conditions intrinsic defects have to be notified to the manufacturer within 8 days from the delivery date by registered mail. Goods with defects never have be utilized or assembled, they should be stored at disposal for controls by the manufacturer appointed person.

#### COMPLEMENTARY INSTALLATION INSTRUCTIONS FOR PROGET DOORS WITH ADDITIONAL CHARACTERISTICS

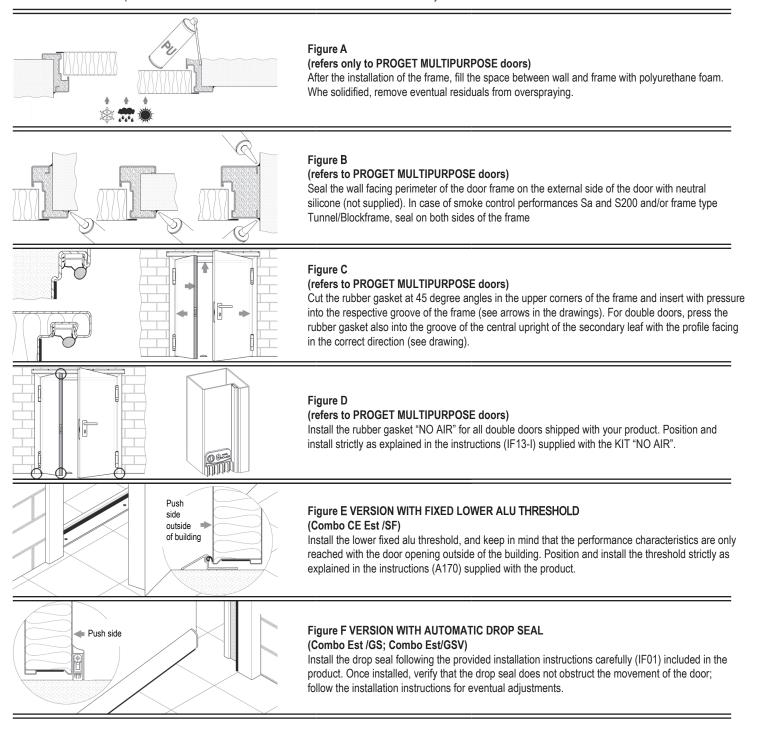

EXTERNAL PEDESTRIAN DOORS CE MARKED according to EN 14351-1:2006 + A2:2016 Certificate CE 0425-CPR-002237

MULTIPURPOSE:

Combo CE Est/SF
 Combo CE Est/GS; Combo CE Est /GSV

ATTENTION: For all warehousing, handling, installation, usage and maintenance related operations please follow carefully the INSTALLATION INSTRUCTIONS for PROGET doors and the present COMPLEMENTARY INSTALLATION INSTRUCTION. If the door has not been ordered with painting suitable for exterior use (UV protection), it is the customer's responsibility to provide an appropriate finishing following the instructions for repainting NINZ doors (see NINZ General borchure). In any case make sure to protect the door from direct contact with atmospheric agents. To protect the door from rain infiltrating the door leaf from above, install a canopy above the door. In case the door is used also as "emergency exit", the opening sense must be such that the door leaf swings outside of the building. In order to reach the additional performance characteristics and the tested values according to EN 14351-1:2006 + A2:2016 please follow the INSTALLATION INSTRUCTIONS carefully.
